SUMMARY

Motivated Computer Science Engineering student with strong expertise in **Industry 4.0 technologies, Android application development, and Machine Learning**. **Silver medalist at both State and Regional levels in the IndiaSkills Competition 2026 (Industry 4.0)**. Experienced in industrial automation tools, smart manufacturing systems, and software development. Demonstrated leadership through organizing technical events, mentoring peers, and leading project teams. Strong problem-solving ability with experience in collaborative technical environments.

EDUCATION

Expected in June 2027
Bachelor of Technology | Computer Science Engineering | CGPA:9.05
C. V. RAMAN GLOBAL UNIVERSITY, Bhubaneswar

SKILLS

PROGRAMMING LANGUAGES : C, Python, Kotlin, HTML, CSS, JavaScript, SQL
TOOLS & PLATFORMS : Google Colab, Visual Studio Code, Eclipse, Android Studio, Node-RED, TIA Ported, UA-Expert, HeidiSQL, MySQL, Indraworks, Netlab Toolkit, WireShark, Proneta, MES, CIROS
COURSE WORK : Android App Development, Database and Management System, Web Development, Machine Learning, Computer Networks, Data Structure and Algorithms, Industry 4.0, Mechatronics
SOFT SKILLS : Leadership, Quick Learner, Team Collaboration, Communication, Adaptability, Time Management, Organized

EXPERIENCE

- **Joint Secretary – CSE Society | C.V. Raman Global University**
  Coordinated technical events and supported academic initiatives.
- **Project Lead – Android App Development | GDG On Campus**
  Led Android App projects and mentored peers in Python and ML.
- **NSS Volunteer | C.V. Raman Global University**
  Participated in community service and social outreach activities.

PROJECTS

- **Emergency Response Drone System**: Designed a drone-based solution for emergency monitoring and rapid response using real-time data and automation.
- **Quiz App**: Developed an interactive quiz application with score tracking and user-friendly UI.
- **Explore City App**: Created a city guide app showcasing places, descriptions, and navigation features.
- **Lunch Order App:** Implemented a food ordering application with item selection and order summary functionality.
- **Unscramble Game App**: Developed a word puzzle game focusing on logic building and interactive gameplay.
